# REMOTELY, ALL IN ONE PLACE

LogTag

LogTag
Mobile App

LogTag Mobile App allows users to access LogTag Online (LTO) in an app instead of the internet browser and can be used by new or any existing LTO users.
LogTag Online is a Cloud-based online environmental management system providing alarm notifications, compliance, record storage and reporting functions.

The LogTag Mobile app also gives users the ability to view and download LogTag data in the cloud, and allows the sharing and securing of the data using a permissions system, all on a mobile device.

LogTag Mobile App

Available on the App Store

Get it on Google Play

Minimum operating system
requirements: iOS 14.0 or later.

Data Security

LogTag Online is committed to providing you with a trusted set of cloud services. LogTag Online complies with all requirements for electronic records including FDA 21 CFR Part 11. We have leveraged our decades-long industry experience building enterprise to create a robust set of LogTag Online security technologies and practices. These work to help reduce the cost, complexity, and risk associated with security in the cloud.
